

RETAIL SALES ANALYSIS FOR ALCOHOL AND LIQUOR

PROJECT OVERVIEW

This dataset comprises detailed monthly records of retail and warehouse movement for individual items across departments and suppliers.

Data was obtained from [Kaggle.com](https://www.kaggle.com)

OBJECTIVE STATEMENT

The objective of this study is to analyze the sales and distribution performance of alcoholic beverages across different suppliers and product types in January 2020. Specifically, the research seeks to evaluate patterns in retail sales, retail transfers, and warehouse sales to identify the most profitable product categories, assess supplier efficiency, and determine factors influencing product movement across sales channels.

RESEARCH QUESTIONS

1. Sales trend over the years
2. What are the top 10 performing supplier by sales?
3. Which specific items of contributed most to total sales volume?
4. Which specific suppliers contributed most to total sales volume?

SALES TREND BY MONTH IN THE YEAR 2020

The sales trend in 2020 shows a significant decline over time. Sales started very high in January, reaching ₦73,700.89, but experienced a sharp drop by July, falling to ₦6,024.41. The downward trend continued into September, where sales further decreased to ₦1,196.55. By March (of the following cycle or recorded timeline), sales hit their lowest point at just ₦133.80.

Overall, the chart indicates a dramatic and continuous decline in sales throughout the year, signaling potential issues in demand, market conditions, or operational challenges.

TOP 10 PERFORMING SUPPLIER BY SALES

- ❑ E & J Gallo Winery recorded the highest sales at ₦6,273.04, indicating strong market performance.
- ❑ Diageo North America Inc (₦5,353.32) and Constellation Brands (₦4,472.47) follow closely, showing strong brand presence and distribution efficiency.
- ❑ The lowest sales among the top ten is The Wine Group (₦2,469.89), still performing above average compared to the general supplier base.
- ❑ There is a clear performance gap between the top three suppliers and the rest, suggesting market concentration among leading brands.

Product with the highest number of Sales

- ❑ Liquor recorded the highest sales with ₦36,316.81, indicating strong market demand.
- ❑ Wine (₦29,745.22) and Beer (₦27,223.02) follow closely, showing they are also major revenue contributors.
- ❑ Non-Alcoholic products generated only ₦1,104.59, significantly lower than alcoholic categories. Store Supplies, Ref, Kegs, and Dunnage contributed minimally, with sales below ₦110, and Kegs and Dunnage recorded ₦0.00.

Top 5 supplier that achieved the highest overall sales performance in 2020 based on retail transfers and warehouse sales

- ❑ Crown Imports recorded the highest sales performance with ₦62,232.80, making it the top-performing supplier.
- ❑ Anheuser Busch Inc and Miller Brewing Company followed closely with ₦51,063.65 and ₦51,113.00 respectively, showing similar strong sales levels.
- ❑ Boston Beer Corporation achieved moderate sales of ₦14,716.58, ranking below the top three suppliers.
- ❑ Heineken had the lowest sales performance at ₦28,165.31, despite maintaining a fair market presence.

Overall, the chart reveals that Crown Imports dominates supplier performance, while others maintain varying but significantly lower sales results.

Recommendations

1.Strengthen Focus on High-Performing Categories

1. Prioritize Liquor, Wine, and Beer in marketing, inventory planning, and distribution, as these categories contribute the highest sales.
2. Expand product variety and promotional activities in these segments to sustain and boost revenue growth.

2.Address Low-Performing Product Lines

1. Investigate the poor sales performance of Non-Alcoholic, Store Supplies, REF, Kegs, and Dunnage categories.
2. Conduct market research to determine whether low performance results from poor demand, limited availability, or pricing issues.
3. Consider promotional strategies, product bundling, or repositioning to enhance sales in these areas.

3.Leverage Top Suppliers' Strengths

1. Strengthen partnerships with top-performing suppliers such as E & J Gallo Winery, Diageo North America Inc., and Constellation Brands, who have demonstrated strong market performance.
2. Negotiate better terms, exclusive deals, or joint marketing campaigns with these suppliers to maintain supply consistency and drive sales volume.

4.Continuous Sales Monitoring

1. Implement a real-time sales monitoring dashboard to track supplier and product performance regularly.
2. Use data-driven insights to quickly identify trends, adjust stock levels, and optimize product mix.

CONCLUSIONS

Sales have shown a significant decline over the years, indicating potential market or operational challenges that need to be addressed.

Alcoholic products (Liquor, Wine, and Beer) dominate total sales, highlighting strong consumer preference in this category.

A small group of top suppliers contributes the majority of total sales, underscoring the importance of maintaining strong relationships with them.

Conversely, low-performing products and suppliers present opportunities for growth through targeted strategies.
